SMART FLOW

THAI LEISURE GROUP

ABOUT

EUROPE'S LARGEST THAI RESTAURANT

Located in the heart of Glasgow on Buchanan Street, you can escape the city at Chaophraya. Set over four floors, they are proud to showcase contemporary Thai design with characterful heritage surroundings, perfect for celebrations and events.

THE CHALLENGE

Chaophraya Thai Restaurant faced the challenge of excessively high water bills with no means of validation. As a solution, SMART FLOW was chosen to address water bill validation, property protection, and sustainability concerns.

THE OUTCOME

Once SMART FLOW was installed, it identified a significant water leak in a toilet, which was isolated to the toilet area and promptly resolved. The SMART FLOW team also provided water-saving adjustments that were implemented, contributing to efficient resource management, cost reduction, and improved sustainability.

- **Saved 60 litres/hour, a 50% reduction in off-peak flow rates.**
- **Saved 500,000 litres of water/year.**

- 500,000 Litres of water saved /year
- 50% reduction in off-peak flow water rates

As Europe's largest Thai restaurant, we have installed SMART FLOW water monitoring technology on our premises as part of our commitment to sustainability. We have achieved substantial water cost reduction, improved sustainability, and enhanced property protection from potential water issues.
